GPS Data Management

PRODUCT SPECIFICATIONS

**Access your fleet's *entire travel history* from
any computer with an internet connection!**

GPS Unit

Storage Capacity:
1Gigabyte

Advanced data compression lets you store up to 15yrs. of trips & sensor data. Document a complete travel history of the vehicle, all within the DVR unit.

Receiver:
158db sensitivity

Compact and easy to install. No roof mounting required. Mounts easily on dashboard, windshield, or any other unrestricted location inside the vehicle.

Software Features

Text Reports

- Track Stops, Idling and Speeding occurrences by user-defined parameters.
- Create custom reports for any period of time,
from one day, one year; up to the lifespan of the unit.
- Easily export data to other software applications for review and analysis.

Know when your vehicle stopped or idled at any location, and when unscheduled stops have been made. Monitoring stops and idling helps with fleet management strategies and save on fuel and reduce emissions.

Map Reports

- GIS map displays each occurrence of user-defined Stops, idling and Speeding violations.
- User can define speed restrictions, and immediately see where violations take place.

Know when your vehicle deviates from defined routes and scheduled stops. Track route patterns, and Monitor driver diligence and adherence to traffic safety.

**Synchronized Data Lets You *INSTANTLY*
Navigate between Map & Text Reports.**
